

BY TELEGRAPH.

OF THE WAR EAST.

RAY FRANCIS June 12.—Bands of Apache have started south and will probably invade Sonora. Another band is reported five miles over the border, besieging Santa Cruz in Sonora.

Advices from General Davis' camp report only three or four Modocs at large. The Pitt River Indians delivered eleven Modoc refugees yesterday to General Davis.

FROM SPAIN.

LONDON, June 12.—A Madrid special to the Times reports that the crisis in the government of Spain continues, and that there is a serious outbreak in the capital.

The Cortes remained in session most of the day, yesterday. During their deliberations a party of armed volunteers surrounded the Palace of the Cortes. A large body of armed police was concentrated at the column of Don de Maia, and detachments of troops were posted at other places in the city, but their services were not required.

The press openly advocates an army revolution. The situation is very disquieting to say the least.

The Irreconcilables oppose the formation of the Ministry from the right. Bodies of irreconcilables and armed partisans of the majority of the Cortes, respectively, occupy strategic positions in the city.

A conflict between opposing factions is feared.

At a meeting of Deputies belonging to the majority, it was agreed in order to conciliate their opponents, to propose that the Ministry be composed of four Consuls.

The Cortes has accepted the resignation of Figueras. At a Cabinet meeting of the majority last night, the following new Ministry was agreed upon: President of the Council and Minister of the Interior, Priy Morgan; Minister of Colonies, Leslie; Minister of Finance, Louis; Minister of Public Works, Benoit; Minister of Justice, Soulares.

The authorities are determined to sustain the majority in whatever measures they may adopt. Senior Figueras has left Madrid.

The treaty alliance between Germany and Italy is reported concluded.

The United States is reported to be in a position to furnish \$100,000,000 to the promotion of trade and investment, capital in Western and Southern States, organized here today. Among promoters of the enterprises are some of the wealthiest Englishmen.

CONGRATULATING STOCKS.

NEW YORK, June 12.—Fully fifteen thousand persons have visited St. James since the opening of the Stock Exchange on June twenty and thirty called yesterday, and tendered their congratulations. The companies of the underwriters are now much elated over the granting of a new trial to Stokes.

THE TRAILER.

RICHMOND, Va., June 12.—The seconds in the recent duel had an unsuccessful attempt for revenge both.

A COSSACK.

NEW YORK, June 12.—The corner is now fully developed. To-day several failures are reported, but no names are given.

MURDER.

HALIFAX, June 12.—A man in this city, to-day, while in the interests of justice, the Inquisitor split his wife's head fatally with an ax. He then cut the throats of his two children, aged three and five years. It is probable that all will die.

QUOTEREF.

Counterfeiter ten cent currency notes have been discovered in circulation. They are apparently well executed.

Mark, the Indian Minister to the United States, according to a Tribune letter from Jecdo, rest under grave accusations preferred by his countrymen for his management of his funds entrusted to his care. It is said that he is suspiciously poor, and his conduct toward his government uncharacterized as generous or otherwise. Mori has been granted leave of absence.

GOOD INDIAN.

WASHINGTON, June 12.—Governor Davis of Texas, telegraphs that he will send Santa and Big Tree, the two Klowns in Fox's "Silent Film," to the State of Indiana, but states that the Indians will be held by the military till after we make an official visit to Washington, which will be in a few days.

RELEASE.

The State Department advises of the release of the Herald correspondent, Price, now known as Price.

Woopoo, June 12.—Three persons were drowned yesterday while trying to board the steamer Andover from a small boat.

A KING DETHRONED.

A PRINCE IN SHACKLES.

A Gay and Festive Coss Comes to Circle.

He comes up like a flower. One day he bloomed scrupulously; another day he withered, and was snuffed out, and this isn't altogether a florid metaphor after all. He called himself Rev. Charles Freeman, and entered Corinna, in broadcloth, smile and sermons. Under the wing of the Preaching Elder, Mr. Davis, he was at once safely settled. John Wesley wasn't nowhere. All the ugly girls of Methodistland railed before him like the storks before the sun.

Then the "storks" went for him and he won for the "storks" and he blew up a thousand hornets in ten thousand fragments. Still his aspiring soul panted for greater fields. He longed largely of horseflesh, with grecian promises of early payment. He bought buggies with cherubic syllables of "any time you call for the money, you know." He loaded himself with a brother's watch that he might not guess too long a sermon out of St. Mark's, or his secret diary laid bare before him like the stars before the sun.

Then the "storks" went for him and he won for the "storks" and he blew up a thousand hornets in ten thousand fragments. Still his aspiring soul panted for greater fields. He longed largely of horseflesh, with grecian promises of early payment. He bought buggies with cherubic syllables of "any time you call for the money, you know." He loaded himself with a brother's watch that he might not guess too long a sermon out of St. Mark's, or his secret diary laid bare before him like the stars before the sun.

Then the beloved Elder suddenly missed his watch and the Rev. Charles Freeman, the bibles for the horses feed and the yokes all fell due, and the agonizing owners of the horse flesh and the vehicles found that he had given them another "lie"—it was also an edict. Then all Dallas rose one morning and found a

new king.

In short, The great Catholicon had arrived. The ecclesiastic could be made whole. Several of the "morality" went to see him behind the scenes. The work at the Necropolis was still great. Dr. King was gravely mortifying, negotiating with the proprietors for the whole concern for a week. Then all at once became the winter of his discontent.

The Dr. King was discovered to be the Rev. Charles Freeman. His beloved brother, Elder Davis, with his equally beloved brother, Rev. Mr. Davis, now at the Necropolis, and mortified because in their way—they wanted him—died would like to take his back to his beloved people of Corinna—but could do without him—and to this day only, were anxious to their keeping exhibited his affliction as a warning. There was one slight trouble.

Wednesday evening, Rev. Charles Freeman, alias Dr. King, left Corinna, in due time, the postmaster.

Obituary—Nathan E. Salmon.

The following obituary was sent to us several weeks ago, but was mislaid; which accounts for the delay in its publication:

TUESDAY MORNING, April 23, 1878.

Nathan E. Salmon, the subject of this notice, was born in Simpson county, Kentucky, A. D. 1802. His parents moved with him to the State of Missouri, and settled in 1807 in Dallas county, near Trinity Mills, where Nathan grew up to manhood, beloved and respected by the entire community in which he lived.

He was well acquainted with him, and can truly say that he was a young man of promise; he was kind and gentle, and had many friends. He was a good boy to his parents.

How painful is the task to record the death of one so kind, manly, and beloved by parents, brothers, and sister and friends. He was attacked, Sunday, 6th April, while preparing to go to Sabbath school, with that fatal destroyer of mankind, cerebro-spinal meningitis. His sufferings were beyond description. Doctors Kyle and McDowell were in attendance and did all they could, but all in vain. So excruciating were his sufferings that four men were employed to keep him in bed. After two days and nights the conflict was over. May we not hope his spirit has found a resting place in that beautiful land of promise, where joy and peace forever dwell?"

J. M. M.

The announcement of W. M. Moon, as he was perceived the resignation of Figueras. At a Cabinet meeting of the majority last night, the following new Ministry was agreed upon: President of the Council and Minister of the Interior, Priy Morgan; Minister of Colonies, Leslie; Minister of Finance, Louis; Minister of Public Works, Benoit; Minister of Justice, Soulares.

The authorities are determined to sustain the majority in whatever measures they may adopt. Senior Figueras has left Madrid.

The treaty alliance between Germany and Italy is reported concluded.

The United States is reported to be in a position to furnish \$100,000,000 to the promotion of trade and investment, capital in Western and Southern States, organized here today. Among promoters of the enterprises are some of the wealthiest Englishmen.

How Far We Are.

Herschel was of the opinion that with the microscope he used in those researches in the heavens which immortalized his name in the annals of science, he could penetrate four hundred and ninety-seven times further than Sirius, assumed to be so far distant that Sirius, assumed to be that instrument, one hundred and sixteen thousand stars fixed by the object glass in the telescope, were visible to the eye at an angle of only 15 degrees. So all the worlds are moving rapidly in space. Receding from the limited suns thus inspected, the whole celestial region could be examined giving time enough to the enterprise only within the scope of assisted vision, more than five billions of fixed stars might be visible, supported by more improved instruments. But more are beyond, vastly beyond, and we are looking and expecting that, when Mr. Clark, the self-made astronomer, of Cambridge, Massachusetts, the most progressive telescope manufacturer now known to scientists, has completed his great work, far more amazing discoveries will be made by his improved instruments. But more are beyond, vastly beyond, and we are looking and expecting that, when Mr. Clark, the self-made astronomer, of Cambridge, Massachusetts, the most progressive telescope manufacturer now known to scientists, has completed his great work, far more amazing discoveries will be made by his improved instruments.
